

The investor decision.

Early learning, connected from classroom to home.

$1.5M	$3.139M	687
MAXIMUM STAGED FACILITY	BASE YEAR-ONE NEED	ITEMIZED COST ROWS

The mission

For ages 2-5: characters, bilingual curriculum, stories, movement, nutrition and family participation. One Independence pilot is the first proof; partner expansion follows evidence.

The connected product

Booker learns. Lumi belongs. Zuri explores. Bop moves. A planned director, teacher, parent and adult-mediated child platform connects work records, approved messages, daily care, CRM, ATS and commerce. No unrestricted child AI.

Where recurring income can grow

Center and church subscriptions; family learning; curriculum and training; implementation and support; merchandise, learning-zone kits, tablet rentals and licensing. These are future opportunities, not signed revenue.

What is visible today

The public brand, stories, activities, bilingual direction, product concepts and professional curriculum/menu reviews. Hosted role flows, billing, security, backups and operating receipts still need acceptance.

Cost and capital reality

Low / base / high: $2,616,874.61 / $3,139,152.61 / $3,963,953.40. Base gap to the facility: $1,639,152.61 before receipts and financing. 133 source-referenced lines; 554 allowances. Market references are not written bids.

Staged facility / stress case

$1.5M is maximum availability, not an immediate draw. At 12% fixed on drawn principal: draws months 1-24, interest-only through month 24, then 84 amortizing months; final maturity is month 108. Full-draw stress is $15,000/month IO, then approximately $26,479.10/month. Total modeled receipts are $2,584,244.33, including $1,084,244.33 interest. First draw TBD and quote-backed.

Repayment remains unproven

Base year-one net receipts: $370,784.80; operating cash before debt: -$874,057.38. All current stress cases fail coverage. Undrawn funds carry no interest; no equity, conversion right, perpetual royalty or prepayment penalty. Stage releases, verify demand, and revise scope or capital before committing.

Animation: the revised allowance

12 × 7-minute episodes. $122,640 episode labor; $13,865 base generation credits for 102 finished minutes with a 4× retry assumption, not measured yield. $539,647 content facet includes separate services. QR/promo labor and finishing need row-level reconciliation.

Next decision: authorize evidence, then release capital.

Verify borrower/IP, license/capacity, lease, payroll, collections, quotes, rights, privacy, security, device tests and signed demand. Approve one episode, two QR clips and a bilingual promo before the season.
