

A stronger classroom. A repeatable business.

A \$240,000 business loan request to launch the center and prove partner adoption, support and renewal.

\$1,800 / month

MONTHS 1–12: INTEREST ONLY

The capital does the work

\$90K center runway; \$45K marketing; \$25K operations; \$30K portals / security; \$15K merchandise launch; \$35K reserve. Advances should follow verified operating and paid-pilot gates.

\$4,982 / month

MONTHS 13–72: AMORTIZATION

Two repayment engines

Center tuition plus net recurring partner receipts. Month-24 growth test: 34 children + 20.76 expected accounts yield \$7,014 before debt / 1.41x coverage at 60% partner contribution; 1.24x at 40%.

What earns the next draw

Verify borrower, IP, license, capacity, roster, collections, payroll and a cost-based cash forecast. Then prove paid pilots, support cost, accepted delivery and renewals.

The lender proposition

Principal + interest; no equity or permanent ownership. Alternatives: \$140K proof launch or \$500K later expansion. The larger facility requires a separate acquisition, staffing and cash plan.

Illustration: 9% annual interest; fully funded at closing; 12 interest-only + 60 amortizing payments. Scheduled \$240K total: \$320,520.32. Fees / optional finite bonus excluded. Staged draws require recalculation.

Growth-test cushion: \$787/month above 1.25x; a 4% tuition collection shortfall lowers combined coverage to 1.16x. Actual costs, paid contracts and capacity remain unverified. Setup and merchandise excluded. Full diligence: Volume 01.
