The world of Futures Friends

Character, story, curriculum and production.

Canon, child respect and bilingual approval guide every release.

LEARN / MOVE / EXPLORE / BELONG

Current controls: 11 October 2026. Full original reference material follows the current plan. Earlier financial assumptions are superseded by the 311-line pilot register and 12-month pilot cash schedule.

Current Master Production Bible

Status: Current working master | **Prepared:** 11 October 2026 **Use:** Investor review, production planning, curriculum alignment, and future licensing conversations.

> This document is the current planning record. Historical source PDFs remain reference material and are not silently treated as current production, financing, accreditation, or operating proof.

1. The proposition

Futures Friends is a character-led early-learning program for children ages **2-5**, built for a pilot at one location and designed to extend into other daycare, church, home-daycare, and family settings. The brand joins story, classroom practice, movement, food education, family connection, merchandise, and a role-based digital platform.

The promise is simple: **Learn. Move. Explore. Belong.** A short story starts a week of play, conversation, observation, movement, nourishment, and take-home connection. Adults remain responsible for the relationship and the safety of the child. Technology supports the adult-mediated experience; it does not replace care or open-endedly converse with children.

This is a one-location, 40-child, 12-month pilot for ages 2?5. The planning register contains 311 individually priced lines: $477,066.02 recurring, $146,964 one-time, $22,044.60 contingency, and $646,074.62 gross including contingency. The separate owner-stated refinance-enabling need is $140,000. The $423,849.52 planning cash estimate is not an approved or financeable loan ask. Building payment, creator invoice, supplier quotes, and receipts remain open.

2. Canon and brand rules

Lead Friends

Friend	Pillar	Visual identity	Performance job	Current status
Booker	LEARN	Brown bear, blue accents and blue eyes, hoodie, Open Book gesture	Story, literacy, listening, trying again, making room	Current canon
Lumi	BELONG	Warm rabbit, pink fur, green eyes, Heart Hands gesture	Welcome, emotional language, boundaries, calm connection	Current canon
Zuri	EXPLORE / NOURISH	Green turtle, glasses, Compass Point gesture	Notice, predict, test, bilingual bridge, food curiosity	Current canon
Bop	MOVE / PLAY	Grey elephant, green overalls, purple identity, Sun Stretch	Movement, practical jobs, independence, body awareness	Current canon

Rory, Nova, and Teo remain proposed classmates. Ms. June is the proposed story-world teacher; Mr. Otis is the proposed café cook. Pip is the current working Episode One child. Story-world adults and proposed classmates must never be presented as real center employees.

The active brand phrase is **Learn. Move. Explore. Belong.** The older **Learn. Play. Explore. Belong.** phrase is historical. New materials use the active phrase unless a source is expressly labeled archival.

Tone and child respect

Stories are warm, funny, specific, and physically readable. A problem is small enough to repair: a tower wobbles, a turn feels hard, a new friend needs room, or a question needs testing. The first attempt may fail safely. Adults ask, wait, and protect the conditions for children to solve. No child is a mascot, diagnosis, behavior label, or sales device. Physical comedy is warned, soft, and supervised.

Repeatable cues include "___ coming through," "Wobble Check… FLUMP," and "Turtle tempo… go-go." The current finite character-message library is adult-mediated and approved-message based. It is not an open-ended child chatbot.

3. Story engine and format

Every episode answers: What ordinary problem appears? Who owns the attempt? How does that strength overshoot? What does the friend feel or risk? Which clue opens a possibility? What changed action repairs the moment?

The episode rhythm is: cold open; welcome; visible problem; first attempt; wobble; pause for the child; second attempt; song or movement; repair; closing circle; book close; short tag. The working development target is approximately six minutes, with no more than three locations. The locked runtime belongs to the approved timed cut.

Episode One: Booker Makes Room

Pip arrives for her first day with Mom and watches before entering. Booker tries to solve her feeling too quickly and overwhelms her. Ms. June helps him ask what Pip needs. He offers a small duck game and waits. When Pip misses Mom, he offers company instead of distraction. Pip retains agency and later asks Booker to save her place. The screenplay, table read, blocking, timing, approved assets, voice, and connected render remain acceptance gates.

Season One pipeline

The current slate is thirteen short episodes. Episode 101 is the active working direction; 102-113 are outlines or development material, not completed media.

No.	Working title	Lead	Learning turn
101	Booker Makes Room	Booker	Ask before solving and make room
102	A Spot for Everyone	Lumi	Ask where a friend wants to be
103	What Melts?	Zuri	Change one variable and observe
104	The Cleanup Beat	Bop	Sort and move together
105	The Missing Rhyme	Booker	Keep trying and accept help
106	The Feelings Forecast	Lumi	Name two feelings together
107	Seed Surprise	Zuri	Watch, wait, notice change
108	Move Like Me	Bop	Notice another person's pace
109	The Rainbow Snack	Ensemble	Explore food by color and choice
110	The Brave Question	Booker	Ask clearly for help
111	Two Friends, One Toy	Lumi	Ask for a turn and wait

No.	Working title	Lead	Learning turn
112	Where Did My Shadow Go?	Zuri	Let "I don't know yet" begin inquiry
113	The Brighter Together Parade	Ensemble	Name and borrow a friend's strength

The older **Wobbly Welcome Tower** title is superseded and must not appear as the active Episode One title.

Phase 2, excluded from this pilot: a national 12-episode animated season, bulk tablets, national marketing, and partner expansion. The current pilot includes a finite $3,000 generation cap; it is not a quote for a 12-episode season. The Higgsfield activity audit remains separate from this pilot register. A future season budget requires an approved schedule, vendor quotes, rights, voice, bilingual adaptation, captions, editing, review, storage, and delivery costs.

4. Curriculum architecture

The learning loop is **Watch, Talk, Do, Play, Reinforce, Take Home**. Futures Friends connects literacy and language, mathematics, science, social-emotional learning, movement and health, nutrition, and creative arts. Five learning zones translate the story into a physical room:

- **Booker's Reading Area:** books, sequence cards, vocabulary, marks, listening.
- **Lumi's Calm Corner:** greeting, feeling language, boundaries, space/company choices.
- **Zuri's Discovery Zone:** observation, prediction, comparison, nature, food inquiry.
- **Bop's Movement Zone:** movement, construction, carrying, practical independence.
- **Eat the Rainbow:** family-style food language, color, choice, safe participation.

Developmental bands are practical rather than diagnostic. Ages 2-3 use objects, pointing, copying, and one anchor word. Ages 3-4 add simple predictions, counting to five, and feeling language. Ages 4-5 add cause and effect, retelling, comparison, and helper roles. "Not seen this week" is an observation entry, never a deficit label.

The source library describes 12 monthly units and 48 theme weeks, 36 recipe concepts, 27 family activities, and 17 printables. Unit and printable approvals are not yet recorded; Spanish printables remain draft or review status. These counts are library inventory, not completed or accredited delivery.

5. Bilingual inclusion

English and Spanish are product-wide requirements across public pages, family materials, character messages, portals, curriculum, captions, and support. Zuri carries a natural bilingual bridge, but Spanish is never a joke, decoration, or accent gag. A Spanish line is shown with immediate meaning in English and is reviewed by a native-speaking Spanish educator before recording or printing. Current Spanish pages, subtitles, and printables must remain labeled draft or review until acceptance is documented.

6. Digital platform and role experience

The future operating platform is an adult-controlled LMS and center system. It must support separated roles and tenant data:

Role	Required experience	Acceptance evidence
Student/Kid Mode	Adult-linked child profile, finite approved messages, curriculum tasks, progress, character media, safe exit gate	Staging walkthrough with test children and server-enforced authorization
Parent/family	Consent, child linkage, weekly digest, assignments, messages, progress, home activities, bilingual settings	Two-family isolation, consent and export/delete test
Teacher	Roster, lesson sequence, observation notes, activities, meal/movement prompts, family communication	Role test with audit trail and no director-only data
Director	Enrollment, staffing, curriculum assignment, portal administration, reports, billing view	Tenant isolation, invite/reset, audit and backup restore
Support/HQ	Product support and aggregate operations without unneeded tenant financial access	Least-privilege review
Partner	Future church/daycare portal, training, kit orders, usage and renewal information	Contracted partner pilot and permissions review

The platform plan includes progress tracking, curriculum work, parent and student login, finite character encouragement, QR-linked habit messages, family tablet support, store/catalog, CRM/ATS, and operational reporting. It must not be described as fully hosted, production-ready, state-approved, or security-certified until the evidence exists.

Planned tablet pilot

A 50-device family tablet pilot is an assumption for planning. Devices would launch into Kid Mode, use remote management, disable unnecessary camera/location/app-store functions, pair by adult QR flow, and support remote wipe. Device, child, consent, rental, and support records require privacy review. Branded cases and children's products require safety and supplier documentation before sale.

7. Meals, movement, and safety

Eat the Rainbow is an educational food framework, not medical advice, CACFP certification, or a substitute for a qualified food lead. A recipe release needs yield, portion, ingredients, allergen flags, choking-safe preparation, substitutions, temperature/holding requirements, crediting evidence, source/date, and reviewer. Adults handle knives, heat, raw proteins, and chemical agents. No child is pressured to taste.

Movement includes Turtle Tempo, Sun Stretch, Heart Hands, stop/go contrasts, outdoor play, carrying, balance, rhythm, cleanup, and seated or adaptive alternatives. The program is inclusive of children using mobility, visual, hearing, or AAC supports. Never force contact, breathing, balance, or a stretch.

8. Production plan

A production package is accepted only when it includes:

- One-sheet, premise, causal chain, and character assignment.
- Script, timing sheet, scene/prop/continuity sheet, and animatic.
- Teacher pause map, movement/song plan, bilingual line sheet, and accessibility notes.
- Safety, rights, music, voice, trademark, and asset provenance records.

- Final picture master, classroom/home versions, captions, audio-only version, teacher pack, family sheet, and acceptance record.

Every generated or licensed asset records source file, creator/provider, generation or license identifier, date, rights status, reviewer, revision, and final hash. A polished image, PDF, or local browser preview is still a proposal until its acceptance fields are complete.

Approval gates

- Canon and character reference locked.
- Table read and child-development review complete.
- Timed animatic accepted.
- Connected render proves continuity and sync.
- Captions, bilingual lines, safety, rights, and accessibility accepted.
- Classroom/home masters delivered and reviewed.
- Release owner signs the acceptance record.

9. Commercial extensions

The same canon can support classroom kits, branded carpets and posters, books, cards, plush after safety clearance, apparel, family tablets, QR habit packs, teacher training, licensing, partner subscriptions, church/daycare implementation, and family merchandise. These are staged opportunities. No future partner revenue is treated as contracted without signed pilots, deposits, renewal terms, or collection evidence.

10. Budget linkage and operating gates

The current pilot register is linked to investor/costs/pilot-budget.json and investor/costs/Pilot_40_Children_Itemized.csv. It contains 311 individually priced lines for the one-location, 40-child pilot. Published references, supplier quotes, and planning allowances remain distinct; each allowance needs a record, written quote, or documented assumption before it becomes a committed purchase.

Budget release gates are: scope approval; vendor quote or written assumption; owner and quantity; purchase approval; delivery/acceptance; invoice and payment record; asset or service handoff; and operating owner sign-off. Root finance work should fill cash timing, draws, receipts, payroll taxes, debt service, and contingency separately. Financing costs are excluded from the current gross total unless the model says otherwise.

11. Roles and accountability

The founder/creative owner owns canon, mission, commercial priorities, and final creative approval. A production lead owns schedule, shot and asset continuity, and vendor coordination. A curriculum lead owns developmental sequence and educator review. A bilingual reviewer owns Spanish acceptance. A nurse/health reviewer and food lead own health, allergy, movement, and menu review within their engagement. Engineering owns platform, privacy controls, data isolation, observability, backups, and release evidence. Operations owns staffing, family support, inventory, purchasing, and partner onboarding. Finance owns the model, invoices, cash forecast, and lender reporting. Counsel owns contracts, privacy, child-safety, employment, licensing, and financing terms.

12. Known contradictions and decisions still required

- Current public-site claims, local previews, and agent test reports do not prove a hosted production platform.
- Educator and nurse statements are reviews of portions of the program, not accreditation or certification.
- The site's older four-session timing and the production target must be reconciled in a dated decision.

- Spanish content and many curriculum units remain draft or review status.
- Future partner, merchandise, tablet, and licensing receipts are uncontracted.

? The fixed-loan concept is retired from this current pilot record; no equity is offered.
? The 40-child pilot must be validated against receipts, staffing coverage, building payment, and financing terms before any facility is proposed.
? The year-two operating margin is currently projected at -$57,738.02 before building and debt, so no profitability claim is made.

The next release is ready only when each open decision has an owner, evidence requirement, date, and signed acceptance record.

Evidence map

Claim area	Source of record	Boundary
Current website/catalog and family positioning	`https://dvolcore.github.io/futures-friends/`	Public copy is not proof of backend operation
Character canon, episode engine, production gates	Complete current Bible and historical reference	Working/current labels preserved
Education, meals, movement, training	Operations companion	Drafts require review and local compliance
Current claims and contradictions	Current business plan and evidence controls	Conflicts remain explicit
Cost and financing | investor/costs/pilot-budget.json; investor/costs/Pilot_40_Children_Itemized.csv | 40-child pilot register; allowances are not quotes; financing costs excluded unless modeled		
Historical PDFs	Original 35-page Bible and 117-page operations companion	Reference only; not silently current

Current production-finance control note

Before batch production, approve a seven-minute episode, two QR clips and one bilingual promo. Record accepted-shot yield, rights, review and complete finishing costs. The account audit and budget reconciliation distinguish observed usage from planning allowances.

Original reference material

The complete original document follows. Its narrative, curriculum and operational detail are preserved. Earlier numbers, readiness claims, financing and production envelopes are historical. The current controls at the front, the 311-line pilot register and the 12-month pilot cash schedule govern the decision.

Editorial status

This revision keeps the original idea intact and brings its working status into line with the public Futures Friends site and the October 2026 development files. It separates published material, working canon, and proposed work so the reader can see what has evidence.

The idea

Futures Friends is a character-led early-learning program for ages two to five. Four character classmates live in Futures, a storybook preschool inspired by Futures Learning Center in Independence, Missouri. Printed puppets, picture cards, and live retelling are the initial physical formats. Plush remains a later product subject to safety testing. Each short story begins with an ordinary classroom problem: a tower leans, a turn feels hard, a new friend needs room, or a question will not sit still. The Friends try, get something wrong safely, borrow one another's strengths, and make a repair children can try with real blocks, words, movement, food, or a friend.

The series line is: **“I don't know yet - but I can try.”** Its practical promise is bigger than a video. A short, co-viewed story becomes a week of talk, play, observation, movement, nourishment, and a take-home connection. The screen starts the work; the teacher, family, and child finish it.

What is canon now

Booker is the series lead: a bear who reads the picture plan, wants to help, and sometimes waits too long to say what he notices. His color is blue; his eyes are blue; his hoodie is blue. His signature gesture is Open Book. Lumi is a warm rabbit with pink fur and green eyes. Her BELONG pillar is calm, welcome, and emotional language. Her gesture is Heart Hands. Zuri is the green turtle with glasses. She leads EXPLORE and NOURISH, asks “What happens if we try?”, and carries the bilingual bridge. Her gesture is Compass Point. Bop is the grey-furred elephant with green overalls and a purple zone identity. He leads PLAY, movement, health, independence, and practical making. His gesture is Sun Stretch.

The current Learning Zones line is **Learn. Move. Explore. Belong.** The older production-bible line, **Learn. Play. Explore. Belong.**, is archival. Use the current Learning Zones line on new product material.

Status legend: **approved** means a dated owner decision exists; **working direction** means current story or product direction still open to review; **draft** means source material exists but is incomplete; **proposed** means a future offer or design; **superseded** means retained for history and not active. This legend applies to character art, voice, bilingual lines, episode titles, portals, merchandise, and standards claims.

Rory, Nova, and Teo remain proposed classmates; their designs, voices, and production credit remain open. The Spanish teacher is a planned story-world adult with no approved art or name and must never be presented as the real center's staff member. Ms. June remains the lead teacher in the story world; Mr. Otis is the café cook. Pip and her first-day story belong to Episode One's current working direction, while Booker remains the viewpoint and decision-maker.

The site supporting-cast manifest is a proposal list, not a claim about real center staff or finished designs.

Name	Story-world role	Status
Ms. June	Encouraging teacher	Proposed
Rowan	Friendly grown-up at drop-off	Proposed
Tilly	Imaginative classmate	Proposed
Pip	New friend	Working direction for Episode 101
Principal Hazel	Principal	Proposed
Mr. Moss	Classroom helper	Proposed
Ms. Fern	Classroom grown-up	Proposed
Nico, Poppy, Finn, Mimi, Tad	Classmates	Proposed
Bruno	Booker’s parent	Proposed
Rose	Lumi’s parent	Proposed
Sage	Zuri’s parent	Proposed
Ella	Bop’s parent	Proposed
Mara	Pip’s grown-up	Proposed

The current manifest names seventeen supporting characters. Together with the four lead Friends, this gives twenty-one characters in that manifest; it does not mean twenty-one finished character designs. Older proposed names remain development options outside this count.

The story engine

Every episode fills six questions: what ordinary classroom problem appears; which lead is responsible for the attempt; how that friend's strength makes the problem worse; what the friend stands to lose inside; which classmate opens a new possibility; and what choice the lead makes. The first attempt fails safely. Nobody supplies the answer before the children have time to notice. A friend names a feeling, shows a strategy, and sees a result. The ending is repaired, visible, and modest.

The repeatable episode rhythm is cold open, welcome, attempt, wobble, pause for the child, second attempt, song or movement, repair, goodbye, book close, and a short tag. The classroom master is designed to stay within a short co-viewing window; home and streaming versions may carry a longer title wrapper. The exact locked runtime belongs to the final timed cut, not to a draft estimate.

Three physical play cues belong to the brand: “___ coming through,” the warned “Wobble Check... FLUMP,” and Zuri's “Turtle tempo... go-go.” They are invitations children can repeat without a screen. Physical comedy stays soft, warned, and seated. Stakes are social and practical, never bodily danger.

Episode One: current direction

The current working title is **Booker Makes Room**. Pip arrives for her first day with Mom, watches before entering, and asks to look first. Booker wants to make her welcome and overwhelms her by trying to solve the feeling too quickly. Miss June helps him ask what Pip needs. He offers a small, quiet duck game and waits. When Pip misses Mom, he offers company instead of another distraction. Pip is never a problem for Booker to fix; her complete first-day experience remains hers. The payoff is that she asks Booker to save her place next time.

The screenplay is still in working review. The current files say that voices, table read, connected blocking, timing, approved Miss June and reception/classroom assets, and a rendered continuity pass are still required. Production should proceed in connected thirty-second blocks, carrying camera side, scale, props, doorway visibility, and emotional state forward. No new paid generation should begin until the read-through and blocking review pass.

Curriculum connection

Public curriculum pages checked October 8 list twelve monthly units and 48 theme weeks. Units 1-11 are drafts; Unit 12 is in writing; none has recorded reviewer approval. The family library lists 27 activities and 17 printables, including eight Spanish draft translations. The public site summarizes the program. Educator delivery requires content review, language review and recorded acceptance before these materials are represented as released.

The six-step learning loop is **Watch, Talk, Do, Play, Reinforce, Take Home**. The public and program materials place Futures across literacy and language, math, science, social-emotional learning, movement and health, nutrition, and creative arts. Each classroom or home setting can be arranged into five zones: Booker's Reading Area; Lumi's Calm Corner; Zuri's Discovery Zone; Bop's Movement Zone; and the Eat the Rainbow dining area.

The program uses screens sparingly and with an adult. Children under two do not receive video. Ages two to three use printed puppets, picture cards, songs, and live retelling; plush is not part of the current physical delivery and remains subject to safety testing. Ages three to five use short episodes as a story starter, with the screen blanked for discussion. These are program standards described in the development materials, not a claim of DESE approval or accreditation. The current site capture presents four six-minute episodes Monday through Thursday for ages three and up, a 24-minute weekly screen rhythm with no Friday episode. Older timing language is superseded development material pending a dated timing decision.

Eat the Rainbow connects food language, family-style meals, color, choice, and safety. No child is pressured to taste. Adults handle knives, heat, serving, and allergy procedures. Movement is built into the week through Bop's games, music, balance, dramatic play, and self-care routines. Observation notes are for noticing and planning, not grading.

Bilingual direction

Futures Friends is being developed in English and Spanish. Zuri carries the bridge because naming, noticing, tasting, and wondering fit her character. Spanish appears first and is immediately understood in English: “¡Mira! Look!” or “¡Verde! Green!” It is never a joke, decoration, accent gag, or test. New Spanish lines require review by a native-speaking Spanish teacher before recording or printing. Current website Spanish, subtitle tracks, and Story Time material are described as draft or in review in the source files; they should not be presented as fully completed bilingual delivery until that review is documented.

World and tone

Futures is a lived-in preschool: carpet, cubbies, café, calm corner, discovery materials, a playground, families at drop-off, and the small routines children recognize. Adults are competent safety nets, not story solvers. They ask, wait, and step in when a child needs help. The tone is warm, funny, physical, and specific. Children are not lectured. The camera allows a pause, a look, a failed try, and the business of other children playing in the background. “___ coming through,” “Wobble Check... FLUMP,” and “Turtle tempo... go-go” are repeatable physical cues.

Production rules

The production bible governs writing, art, music, voice, curriculum, licensing, and manufacturing. Human direction owns the final choices even when tools assist with research, drafting, image development, or animation. Every release needs a canon check, script and timing review, child-development and safety review, art and continuity check, accessibility check, rights and credit check, and final rendered inspection. Keep a source record for every generated or licensed asset.

The production gates are practical: lock the premise and character reference; table-read the script; approve the timed animatic; review the connected render; clear music, voices, marks, and artwork; then deliver the classroom, home, and accessibility masters. Prompts and downloads document work in progress. Release begins only after the named gates are signed.

Each episode package should contain the one-sheet and causal chain, script, timing sheet, character and prop continuity sheet, animatic, teacher pause map, song or movement plan, bilingual line sheet, accessibility notes, safety review, rights log, final picture master, classroom and home versions, captions, teacher pack, family sheet, and acceptance record. The asset register should retain source file, creator, provider or generation identifier, date, rights status, review status, and final file hash. The release owner signs canon, premise, script, animatic, connected render, rights, safety, and delivery gates. An unsigned gate keeps the item in development.

The curriculum uses three developmental bands. Ages two to three use objects, pointing, copying, and one anchor word. Ages three to four add simple predictions, counting to five, and feeling language. Ages four to five add cause and effect, retelling, comparison, and helper roles. Children are never ranked or assigned a Friend by gender or behavior. “Not seen this week” is an observation entry, not a deficit label.

Season development

The Bible's Season One slate is thirteen short episodes, each built to carry a classroom week and a take-home cue:

No.	Working title	Lead	Learning turn	Current status
101	Booker Makes Room	Booker	Make room for a new friend and ask before solving	Current working direction; screenplay and connected-block review pending
102	A Spot for Everyone	Lumi	Ask where a friend wants to be	Outline
103	What Melts?	Zuri	Make one fair test instead of trying everything	Outline
104	The Cleanup Beat	Bop	Sort and move together	Outline
105	The Missing Rhyme	Booker	Keep trying a word and accept help	Outline
106	The Feelings Forecast	Lumi	Name two feelings that can sit together	Outline
107	Seed Surprise	Zuri	Watch, wait, and notice what changed	Outline
108	Move Like Me	Bop	Watch another person's pace before joining	Outline
109	The Rainbow Snack	Ensemble	Explore food by color, smell, and choice	Outline
110	The Brave Question	Booker	Ask for help clearly	Outline
111	Two Friends, One Toy	Lumi	Ask for a turn and wait	Outline
112	Where Did My Shadow Go?	Zuri	Use “I don't know yet” as the start of an investigation	Outline
113	The Brighter Together Parade	Ensemble	Name a friend's strength and borrow the strategy	Outline

The four opening stories establish the lead pillars. The middle of the slate lets a strength overshoot and become a blind spot. The finale combines the Friends' strategies. Episodes 102-113 have scene-by-scene development material, but full scripts and timed animatics do not yet exist. This slate is a pipeline and rights asset; it is not completed media. **The Wobbly Welcome Tower** is superseded Episode One development material; it must not appear as the active title.

The production format has a fixed wrapper and a usable classroom rhythm: a cold open, title and welcome, a visible problem, a safe first failure, a pause for children to notice, a second attempt, a song or movement beat, a repair, a closing circle, a book close, and a short tag. The development master targets approximately six minutes per episode, three acts, no more than three locations, and a weekly teacher pack. The exact runtime belongs to the locked cut.

Character performance and continuity reference

Booker's dramatic job is to make room for other children while learning to name what he sees. He studies the picture plan, checks the edge of a block with one paw, and pauses with his half-paw raised when he is unsure. His blue eyes and blue accents must remain consistent across key art, classroom cards, carpet art, and animation. His voice is warm and careful, with short sentences and real pauses. Useful lines are “I see a wobble,” “Can I try beside you?” and “I need a minute to look.” He may over-prepare, but he never becomes a miniature adult.

Lumi carries welcome, feeling language, and belonging. Heart Hands is a physical reset: hands to chest, breath, then an invitation. She can say, “I am disappointed. I can still ask,” or “Do you want space or company?” Her action should lead the scene; she is not the friend who only comforts others. Her pink fur and green eyes must remain consistent across key art, cards, carpet art, and animation. Her voice should feel bright and grounded, with no forced baby pitch.

Zuri uses her glasses, Compass Point, and a slow look at evidence. She predicts, tests one change, and reports what happened. A bilingual line can be “¿Qué pasa si probamos? What happens if we try?” only after native review. Her curiosity is physical: she lines up two objects, turns one over, or points to the part that changed. Her voice is precise without sounding like a science presenter. The glasses, shell pattern, and eye direction need a continuity check whenever she appears in a close shot.

Bop is a grey-furred elephant in green overalls with a purple brand color. He brings movement, practical making, and independence. Sun Stretch is his reset; Big Stomp and Small Stomp give children a safe contrast in force. He can say, “That was fast. I can try turtle tempo,” then change his body. He is not the silly one and does not speak in a baby voice. His performance carries thought through weight, balance, breath, and a visible choice.

Ms. June is the story-world teacher. She asks, waits, and protects the conditions for children to solve a small problem. Mr. Otis is the café cook and a model for calm food routines. Rory, Nova, and Teo remain proposed supporting classmates until their designs, pronouns, voices, palettes, and credit treatment receive a canon gate. Pip is the current Episode One child and must retain agency through arrival, observation, separation, and re-entry. No character may be treated as a diagnostic label, a sales mascot, or a stand-in for a real employee.

Scene craft and delivery evidence

The room should keep doing business while the story is happening: a child carries a tray past the camera after a warning, a friend watches from the carpet, a block is returned to the shelf, or a caregiver signs a picture card at pickup. Preschool dialogue is short because children are busy. A good exchange is: “Is this your spot?” “I want to look.” “Okay. I will wait here.” The camera holds long enough to see the choice. Every scene should identify the lead want, the observable obstacle, the first attempt, the clue, and the changed action.

Continuity sheets must record camera side, character scale, eye line, prop position, doorway and window visibility, wardrobe, lighting, emotional state, and the exact handoff into the next thirty-second block. The editor should review blocks in order before approving a longer cut. Voice auditions are candidates, not locks. A liked audition remains open until the voice owner approves the child-safe performance, the director approves intelligibility, and the connected render proves sync and continuity. Adult-sounding or synthetic child reads fail that gate.

A release package is more than a video file. It includes a clean classroom master, a home or streaming wrapper, a caption file, an audio-only version, a picture-card sequence, a teacher pause map, a bilingual line sheet, an accessibility note, a song or movement plan, a family take-home sheet, a rights log, a safety sign-off, and an acceptance record. The register stores source file, creator, provider or generation ID, creation date, rights status, reviewer, revision, and final hash. A finished-looking image or PDF is still a proposal until its rights and acceptance fields are complete.

The production order is premise and character lock, table read, timed animatic, connected render, sound and caption review, safety and rights review, then delivery and classroom acceptance. Episode 101 is currently between screenplay and connected-block review. **Booker Makes Room**, with Pip's first day, is the active working title. The Wobbly Welcome Tower is superseded archive material and is retained only for craft reference.

The earlier 101 development material still matters as a craft reference. Booker wants a Welcome star on a tower. A round block rolls out with a soft FLUMP. He says, “I noticed something,” rather than blaming the block. The class tries a wider base, using the sand timer, Lumi's tape, Half-Paw, and the star foot as planted details. The payoff is a smaller tower that holds because Booker changed the base. If this material remains in the season, the current Pip story must be labeled as the Episode One revision and the older tower material must be retained as a later or alternate development draft. A production slate cannot carry two unmarked versions of the same episode.

The thirteen family tags also need delivery evidence. The 101 tag uses a picture-plan card and a small “save your place” welcome cue from Pip’s first-day story; the older Kitchen Tower tag is superseded archive material; 102 uses a Spot at the Table; 103 uses two ice pucks; 104 uses a Toy-Bin Beat; 105 uses a BED/RED rhyme card; 106 uses a feelings card; 107 uses five bean drawings; 108 uses a First/Then card; 109 uses a color hunt; 110 uses a help card; 111 uses Count-to-10 Turns; 112 uses chalk shadow play; and 113 ends with a Family Strength Parade. These are useful program assets, but each needs its own printable, bilingual review, accessibility note, rights status, and acceptance record before it is called a finished family product.

Music must serve the child's action. A song spot can cue Turtle Tempo, Sun Stretch, Heart Hands, a cleanup beat, or a question. Lyrics should be short enough to repeat and should not require a child to disclose a feeling publicly. The music register records writer, performer, license, clean version, caption text, and permitted uses. A movement clip is a classroom tool only after an adult reviews space, pace, sensory load, and adaptation for mobility differences.

Rights and safety boundary

The source Bible identifies IP ownership, licensing, marks, and staff-created materials as open legal work. Do not state that the company owns every character, mark, or curriculum asset until assignments and licenses are executed. Do not use “accredited,” “approved,” or “tested” without the named body, date, scope, and evidence. Use “designed to align with” when describing Missouri early-learning, Head Start, health, or childcare standards.

Preserved original and source record

The complete 192-page original Bible is embedded in this PDF as an attachment, alongside the section-retention ledger. It remains the unabridged archival reference. Its original cover, timing, character variants and retired Episode One do not govern current production. Open the PDF attachment panel in a compatible reader to view it; browser previews may hide attachments. The separate Source Files folder also includes the original for direct access.

Source record

- Futures Friends Bible v3.0, Production Bible PDF, pp. 1-15 and 80-90.
- Character canon bilingual addendum, dated 7 October 2026.
- Episode One Booker lead decisions and cost-reset story review.
- Futures Friends Center Curriculum v1.0, pp. 1-8.
- Current site supporting-cast manifest, supporting-cast.js, retrieved 8 October 2026.
- Public curriculum, family, Academy, Hub and store pages checked 8 October 2026; the earlier release-manifest.js snapshot is retained as historical evidence.
- Public website, https://dvolcore.github.io/futures-friends/ (current manifest retrieved 8 October 2026; prior page snapshot retrieved 7 October 2026).

Production development master

Current / working / proposed / archival

The current canon governs release. Working references support production. Proposed cast and archival craft are not approved deliverables.

EVIDENCE KEY

Verified: source or test recorded. Configured: setup exists. Proposed: terms to agree. Planned: delivery or acceptance outstanding. Each claim carries its own status in the text.

LEARN | MOVE | EXPLORE | BELONG

How to read this master

The first part of this document carries the current investor-facing canon. This restored section keeps the working detail that made the original Bible useful to writers, directors, teachers, artists, and reviewers. It is a development specification, not evidence that a season has been produced or that a standard has granted accreditation. “Current” means supported by the current site or a dated owner decision; “working” means the present creative direction; “proposed” means a useful design awaiting approval; “legacy” means retained for craft history and barred from current Episode 101 continuity.

A recurring mistake in early-learning media is to describe a value as if it were a character. A production team cannot animate “confidence.” It can animate a paw rising halfway, a child waiting at a doorway, or an elephant slowing a trunk before it touches a block. Every character page therefore moves in this order: identity, want, fear, strength, blind spot, tell, comedy, voice, movement, home connection, classroom function, season arc, guardrails, and sample lines.

Booker / the series lead

Brown bear / blue irises / blue hoodie / current development illustration; final approval remains open.

Booker makes room by choosing company before trying to fix the problem. Preserve the character's eye color, scale, outfit and emotional state across the connected scene.

Bop / movement and reset

Gray elephant / green overalls / purple zone identity / current development illustration; final approval remains open.

Purple belongs to Bop’s zone identity. It is not a direction to recolor the character. Movement should be copyable, supervised and adaptable.

Zuri / discovery

Green turtle / glasses / explorer setting / current development illustration; final approval remains open.

Use the current explorer artwork as a development reference. Keep outfit, accessories and props traceable to the approved scene sheet.

The four Friends in working detail

Booker - the Brave Little Learner

Booker is a brown bear, he/him, coded for ages four to five. His current public-facing color identity is blue, with blue eyes and a blue hoodie. The original Bible's red book remains a proposed comfort prop only where the owner approves the asset: it is never a tablet, and its proposed meaning is that home can travel with a child. His open-book gesture and the line “I don't know yet - but I can try” remain the stable performance core.

Booker's want is to help in a way that counts. His fear is saying the wrong thing while everyone looks. His strength is seeing order: the missing step, the block in the wrong place, what comes first and next. His blind spot is believing silence is safe. He sees first and says last. The visible tell is the Half-Paw: his paw rises halfway, hovers for at least a beat, and drops. His ears flatten when he holds something in; his paws touch his backpack straps when he is walking through a worry. The growth payoff is that the paw stays up in the current Episode 101 direction and eventually rises straight in the ensemble finale.

His comedy comes from three plans and no volume. He prepares a sentence until the moment has moved on, then celebrates a small success with a solemn nod and “...Yes.” He may narrate a harmless event as a chapter title, but the joke is careful observation, never a child's wrong answer. The useful physical action is stillness, a careful tiptoe, a late double-take, or a correct small structure built at the edge of frame while everyone else is busy.

Booker's voice uses three to eight words most of the time, with a twelve-word ceiling. He starts, stops, and restarts naturally: “It says - um. It says wide first.” He favors “first,” “next,” “carefully,” “actually,” and “the end.” He never says “I'm dumb,” “You're wrong,” or “Obviously.” His walk is heel-to-toe, with a threshold pause at a doorway. His dance begins as a careful step-touch and grows one measure at a time. A teacher can use picture-step cards, the reading nook, and “What did you notice?” without making quietness a defect; pointing counts as participation.

The original family proposal names Dad Marcus, Mom Renée, and Ivy, Booker's older sister. That household remains proposed. It is useful because Marcus's night-shift schedule and Renée's bus route give the writers ordinary reasons for a quiet morning, a pickup question, and Booker's “save one thing for dinner” ritual. None of these details should be printed as current family canon until the owner approves the family addendum.

Lumi - the Kindness Keeper

Lumi is a pink-furred rabbit with green eyes. Her BELONG pillar is welcome and emotional language. Heart Hands means hands to the chest, a breath, and an invitation. Her stable line is “Notice. Ask. Listen.” Her want is everybody in, every time. Her blind spot is deciding what welcome should look like before she asks the person arriving.

Lumi's ears carry the emotional read. One ear swivels when she notices; folded ears can mean worry; drooped ears can mean sadness or tiredness; both ears lifting can mean delight. The ears are never a cute decoration and never a gag. Her comedy is an over-organized welcome: tape, labels, a perfect spot, and a plan that leaves no room for the actual person. Her counter-action is asking a direct question and accepting the answer.

She speaks in four to ten words, with the occasional twelve-word sentence when she is naming a feeling. She can say, “I am disappointed. I can still ask,” or “Do you want space or company?” She never turns another child's feeling into a performance. Her movement is an open beckoning arm, then a small pause. A classroom use is the calm corner, a choice card, and a teacher question such as “What would feel comfortable?” Her proposed home material includes a parent or caregiver who models welcome without taking over; the family design remains open.

Lumi's season work begins with learning to ask before arranging a spot, continues through holding two feelings together, and ends with listening for another Friend's strength. She needs an active choice in every episode she appears in. She is not a permanent comforter, assistant, or emotional service character.

Zuri - the Curious Explorer

Zuri is a green turtle with glasses, coded for ages four to five. Her EXPLORE and NOURISH work centers on curiosity, observation, food language, and the bilingual bridge. “I wonder - let's find out!” and “Turtle tempo... go-go!” are performance tools. She asks a question, predicts, tries one change, watches, and tells a friend what happened.

Her strength is noticing change. Her blind spot is trying to answer the question immediately, sometimes before the group has looked. Her neck draws partway toward the shell when puzzled; the brim or glasses angle changes when she is thinking; a compass tap marks the moment she chooses one test. She never fully retreats into the shell as a fear gag. Her comedy is a slow body with a firework brain: a leaf or safe large find arrives with her, a brim tip sends it sliding, and three questions arrive before the first answer.

Zuri's questions are two to six words and never more than three in a row. Her vocabulary includes predict, melt, steady, wide, narrow, shadow, and look close, spoken while pointing to something real. A bilingual line such as “¿Qué pasa si probamos? What happens if we try?” requires native Spanish review before recording or printing. Teachers can use a Wonder Question of the Day and a prediction chart. They should not use Zuri to supply the answer or treat Spanish as decoration.

A proposed family anchor includes Mom Celeste, a mechanic, and Gran Winnie, a retired crossing guard, with a Wonder Porch and Wonder Shelf. This is a useful relationship design awaiting approval. Zuri's season moves from trying everything at once, to one fair test, to watching a change, to saying “I don't know yet” without embarrassment, and finally to asking another Friend what they noticed.

Bop - the Happy Doer

Bop is a grey-furred elephant with green overalls and a purple zone identity. The original Bible used orange as a graphics color and a warm-yellow shirt with sky-blue overalls; current artwork and merchandise must use the dated character sheet as the controlling reference. The stable gesture is Sun Stretch. Big Stomp and Small Stomp give children a safe contrast in force. His line is “I can do it - and we can do it together.”

Bop wants to make things happen now. He fears being left out of the action and hears “slow down” too often. His physical intelligence is balance, weight, rhythm, and the instant before something tips. His blind spot is starting before everyone has the whole picture. His body is large and his touch is gentle; size is never a joke. The trunk-tip catch is a recurring proof of precision. “___ coming through!” is a warning and an invitation, not permission to crash through a room.

HISTORICAL REFERENCE | Current controls at front supersede financial, scope and readiness assumptions.

His voice is short: one to five words, usually, with clear action verbs, counting, and sound words. He never says “slowpoke,” “duh,” or “I don't care.” His comedy is a large wind-up ending in a delicate finish: a block slips, the trunk catches it, and Bop says, “That was fast.” A teacher can give him a real job during a wait, use a cleanup beat, and say, “Whole direction first... now go!” The teacher should never use Bop's name to shame energy or demand stillness.

The original household proposal names Mama Grace, a walking mail carrier, and Daddy Calvin, a furniture mover, with two homes and a switch bag. It remains proposed. The valuable story function is that a child can move between homes without the story treating either home as broken. Bop's season moves from carrying a pile alone, to organizing a shared rhythm, to adapting to a friend's pace, and finally to stopping long enough to name the problem.

Supporting story-world cast and relationships

The current site manifest verifies Ms. June, Rowan, Tilly, Pip, Principal Hazel, Mr. Moss, Ms. Fern, Nico, Poppy, Finn, Mimi, Tad, Bruno, Rose, Sage, Ella, and Mara. These names are proposed story-world roles except Pip's working Episode 101 direction. They do not represent real staff. The original Bible also developed Mr. Otis, Rory, Nova, and Teo. Those characters remain useful for production development but are proposed until the owner reconciles them with the current supporting-cast source.

Ms. June is a giraffe teacher in the original look, warm and unhurried. Her function is to ask, wait, and protect a child's chance to try. She should have few lines and never take the solution beat. Mr. Otis is a hippo café cook whose humor comes through named pots, a hum, and calm food routines. Rory, a fox with a wheelchair in the original proposal, and Nova, a raccoon with an AAC tablet, are ordinary classmates. Their access tools are part of how they move and communicate; they are never the problem a story fixes. Teo is a penguin who collects words and mixes languages. These are representation and writing proposals, not claims of completed casting or approved character art.

The episode rule is light recurrence: the lead Friend owns the emotional turn; Ms. June has only the lines needed for safety and a question; no more than three classmates speak in a scene unless an ensemble payoff calls for more. Background children continue real business - carrying a tray, returning a block, watching from the carpet, signing a picture card - so the room never becomes a stage with only two people in it.

Format, timing, and story obligations

The current public rhythm is four six-minute episodes Monday through Thursday for ages three and up, 24 minutes weekly, with no Friday episode. That timing controls current site language. Older timing language is superseded development material pending a dated timing decision. A final episode duration must come from the timed cut.

Every story has one ordinary classroom problem and one lead choice. The concept is the obstacle, not a lecture added after the plot. The lead's strength, used alone or too hard, causes part of the trouble; another Friend's strength opens a possibility; the lead chooses the repair. There is no villain, shame, magic fix, or adult rescue. The first attempt fails safely. A pause gives the child time to notice. Feelings follow four steps:

visible cue, feeling word, named strategy, shown result. At least four participation prompts should be timed and answered kindly on screen.

The repeatable structure is cold open, welcome, attempt, wobble, child pause, second attempt, song or movement, repair, goodbye, book close, and tag. Keep the core problem in one location where possible and use no more than three locations. Dialogue is paced for captions, normally under 130 words per minute, with sentences under twelve words. The title wrapper can differ for home or streaming, but the classroom master must protect the pause.

The writer's causal-chain page answers: what changes, what action causes it, what becomes harder, what clue is available, what the child can predict, and what the final action repairs. Every event must force the next. If removing a beat leaves the next beat unchanged, the beat is decoration and should be cut or repurposed.

Episode slate and Episode 101 boundary

The current Season One slate contains 101 Booker Makes Room, 102 A Spot for Everyone, 103 What Melts?, 104 The Cleanup Beat, 105 The Missing Rhyme, 106 The Feelings Forecast, 107 Seed Surprise, 108 Move Like Me, 109 The Rainbow Snack, 110 The Brave Question, 111 Two Friends, One Toy, 112 Where Did My Shadow Go?, and 113 The Brighter Together Parade. The first four establish the pillars; the middle episodes let strengths overshoot; the finale combines strategies.

Episode 101's current working direction is Pip's first day. Pip arrives with a grown-up, watches before entering, asks to look first, and misses home. Booker wants to welcome her and moves too quickly. Ms. June helps him ask what Pip needs. He offers a quiet game and waits. Pip asks Booker to save her place. Booker remains the series lead and decision-maker; Pip owns her first-day experience.

The earlier Wobbly Welcome Tower/Family 101 Kitchen Tower material is legacy craft reference, not the active Episode 101. Its useful mechanics are retained only when relabeled: a tower wobbles, a round block rolls, a soft “FLUMP” gives the group a clue, and a wider base repairs the structure. Do not put that tower title, tag, or premise into the current Episode 101 asset list. If the story returns later, it needs a new episode number or an explicit alternate-draft label.

Art and asset continuity

The controlling character sheet records species, pronouns, silhouette, eye color, fur color, wardrobe, icon, gesture, and signature prop. Booker is blue-eyed with a blue hoodie; Lumi is pink-furred with green eyes; Zuri is a green turtle with glasses; Bop is grey-furred with green overalls and purple identity. Every poster, carpet, puppet, picture card, thumbnail, and animation frame must pass this check. A color may shift for print calibration, but a character's identity color cannot drift between a zone, a poster, and a product listing.

The physical starter kit uses printed puppets and picture cards. Plush is a later merchandise possibility after material, seam, small-part, cleaning, and age-range review. Carpets and fences are separate add-ons, and each carpet carries the character, zone color, icon, and matching poster only after a design owner accepts the paired set. Merchandise art must preserve the full product view and record whether the image is a

mockup, approved production art, or a photographed manufactured item.

The world is a lived-in preschool: carpet, cubbies, café, calm corner, discovery materials, playground, families at drop-off, and accessible routes. Ramps, wide doors, reachable shelves, and accessible play equipment exist before a story needs them. The Futures Learning Center real logo, contact details, and sales copy do not appear inside the story world. Print inside the world is environmental and spoken aloud when a character points to it. There are no entertainment screens inside Futures; Nova's proposed AAC tablet is a communication device, never a gag.

Music, sound, and voice

Music serves the child's action. A song can cue Turtle Tempo, Sun Stretch, Heart Hands, a cleanup beat, or a question. Lyrics remain short enough to repeat and do not require public disclosure of a feeling. Bop-led pieces can sit around 110-140 BPM when the movement remains copyable; Zuri's Turtle Tempo changes speed for a single playful bar, then returns to a manageable pace. Every song has a clean master, lyric sheet, caption text, writer and performer credit, license status, and permitted-use field.

Sound design makes the classroom legible: soft block contact, a safe roll, a doorway, a tray, a pencil, a breath before speaking. The “FLUMP” is warned, soft, and never a body-impact gag. Voice auditions remain candidates until a human owner approves child-safe performance, intelligibility, and sync in the connected render. Adult-sounding or synthetic child reads fail the review. Spanish lines receive native-speaker review before the record or print gate.

Curriculum, developmental design, and UDL

The learning loop is Watch, Talk, Do, Play, Reinforce, Take Home. It links literacy and language, math, science, social-emotional learning, movement, nutrition, and creative arts without turning the story into a worksheet. Ages two to three use objects, pointing, copying, and one anchor word. Ages three to four add simple predictions, counting to five, and feeling language. Ages four to five add cause and effect, retelling, comparison, and helper roles. These are design bands, not assessments or diagnoses.

A teacher may choose the screen, audio-only cue, picture card, object play, movement, or family conversation. Every key visual is said aloud for children who cannot see it. A child can answer by pointing, moving, using AAC, speaking another language, or watching and returning later. No Friend is assigned by gender, body, behavior, or presumed ability. A note that an action was not seen is an observation, not a deficit label.

Nutrition material uses food language, color, choice, family-style routines, and allergy procedures. Adults handle knives, heat, serving, and ingredient verification. No child is pressured to taste. Movement is spread through the day and adapted for mobility, sensory, and space needs. These choices are designed to align with applicable early-learning and health guidance; they are not accreditation claims. Public pages give parents a clear overview; fuller educator plans require the appropriate portal access.

Bilingual delivery is English and Spanish with immediate meaning, such as “¡Mira! Look!” or “¡Verde! Green!” The line is never an accent joke or decoration. Native Spanish review covers vocabulary, regional clarity,

captions, printables, and family-facing instructions. Draft translations remain labeled draft until reviewed.

Production workflow and decision governance

The owner approves canon, premise, final story direction, and commercial use. The writer owns the causal chain and dialogue. The director owns blocking and performance. The art lead owns reference sheets and continuity. The music and sound lead owns recordings, licenses, and mix. The curriculum lead owns the pause map and educator material. The safety reviewer checks movement, food, products, and age fit. The rights lead checks marks, assignments, licenses, and credits. A release coordinator preserves the evidence.

Gates are: Gate 0 canon and rights boundary; Gate A premise and character reference; Gate B script, causal chain, participation pauses, and safety; Gate C table read and timed animatic; Gate D connected render, voice, sound, captions, bilingual review, and continuity; Gate E rights, accessibility, and product safety; Gate F delivery, portal placement, and acceptance. A gate is open only when the named owner has dated the decision and the evidence is stored. A draft image, prompt, download, or polished PDF does not close a gate by itself.

The acceptance record names the version, source files, creator or provider, generation identifier where applicable, date, rights state, reviewer, accessibility state, safety state, final hash, and destination. The production team must be able to answer which file was reviewed and which file was delivered. If the answer is unclear, the item remains in development.

Retention and unresolved evidence

The restored master retains the original Bible's series line, learning loop, causal-chain method, character tells, home proposals, supporting-cast inclusion rules, season slate, story-world boundaries, art continuity rules, sound and voice standards, curriculum bands, bilingual safeguards, merchandise firewall, rights language, and gate model. The current website overrides older timing, current lead-art colors, physical kit format, public portal claims, and Episode 101 direction where the two conflict.

Open evidence remains: owner approval of the final house line; a dated character-sheet lock; canon decisions for Rory, Nova, Teo, Mr. Otis, and the proposed families; final Episode 101 script, timed cut, voice, and connected render; native Spanish review records; product safety testing for plush and any physical kit; executed IP assignments and licenses; and acceptance evidence for each portal release. No investor-facing document should describe these as completed.

Preserved working matrices

The following matrices are retained because they make the Bible usable at a desk. They are production instruments, not decorative description.

Friend-to-Friend story matrix

Pair or trio	Natural engine	Typical friction	Repair action	Adult guardrail
Booker + Lumi	A quiet observation becomes a kindness check.	Booker withholds a thought; Lumi fills the silence too quickly.	Booker points to the detail; Lumi pauses, asks, and listens.	Do not make quietness a failure or kindness a reward for compliance.
Booker + Zuri	A word or pattern becomes a question.	Booker wants the correct word before trying; Zuri leaps ahead.	They name what they know, predict one next step, then test it.	Keep the question open; do not turn the scene into a quiz.
Booker + Bop	A careful plan meets a physical attempt.	Bop moves before the plan is shared.	Booker gives one clear step; Bop demonstrates it and looks back for the group.	Bop's enthusiasm cannot be treated as misbehavior.
Lumi + Zuri	Belonging makes exploration safer.	Zuri follows the object; Lumi follows the people.	Zuri names the discovery; Lumi makes room for another observer.	Never assign empathy only to Lumi or curiosity only to Zuri.
Lumi + Bop	A social ritual becomes a movement game.	Bop changes the rhythm without checking the group.	Lumi offers a simple cue; Bop repeats it and invites a partner.	Movement must remain copyable and optional.
Zuri + Bop	Hands-on discovery with visible cause and effect.	Bop wants the result; Zuri wants to investigate every step.	Bop holds or moves one safe piece while Zuri narrates the change.	Adult handles small parts, heat, tools, and food hazards.
All four	A shared classroom problem requires different contributions.	One Friend takes over or the group speaks at once.	Each Friend has one useful job; the solution is assembled together.	No “smart one,” “good one,” or permanent leader framing.

A scene earns its group ending when at least two different contributions matter to the result. If a single Friend solves the problem while the others clap, the writer must revise the causal chain. The repair should be visible in action: moving an object, changing a plan, making space, asking a question, or trying again.

Six recurring story engines

1. **Notice and name:** a child sees a small change and gives it language.
2. **Plan and test:** the group makes one prediction, tries it, and observes the result.
3. **Make room:** a physical or social space is crowded; the group changes the arrangement.
4. **Try a new way:** the first method does not work; the second is smaller, safer, or clearer.
5. **Care and return:** an object, routine, or classmate needs attention, then returns to the group.
6. **Teach back:** a Friend shows a repeatable action and lets another child lead the next turn.

Each engine has the same minimum card fields: child-facing problem, first attempt, visible consequence, pause for participation, revised attempt, named learning idea, and take-home bridge. “They learn to cooperate” is not a sufficient card; the writer must identify who moved what, said what, or changed what.

HISTORICAL REFERENCE | Current controls at front supersede financial, scope and readiness assumptions.

Current episode development slate

These are working development cards. A title marked outline or draft has not been represented as a completed episode, final render, or accepted portal asset.

Unit	Working title	Story movement	Curriculum bridge	Status
101	**Booker Makes Room**	Pip arrives for a first day. Booker notices the new child, the group changes its arrangement, and Pip gets a real way to join.	Belonging, language, spatial thinking, transition routine.	Current direction; script/render evidence still required.
102	**The Question Path**	Zuri follows a series of clues and learns to leave a clear question for the next person.	Inquiry, sequencing, vocabulary.	Outline.
103	**Lumi's Listening Spot**	Lumi creates a place where several kinds of communication can be heard and seen.	Listening, AAC-respect, turn taking.	Outline.
104	**Bop's Two-Step Job**	Bop wants to do everything at once and discovers a two-step classroom job.	Executive function, movement, sequencing.	Outline.
105	**The Color That Changed**	A color looks different in a new light; the Friends compare rather than argue.	Observation, color, descriptive language.	Outline.
106	**Booker Tries the Word**	Booker tests an unfamiliar word in a low-pressure group exchange.	Emergent literacy, confidence, phonological play.	Outline.
107	**Zuri's Small Discovery**	Zuri slows down enough to notice a tiny living-world detail.	Nature observation, scale, care.	Outline.
108	**A Place for Every Voice**	The group redesigns a sharing routine so pointing, gesture, speech, and AAC all count.	Inclusion, communication, community.	Outline; standards review required.
109	**Bop Builds a Bridge**	Bop's first bridge falls apart; the group changes the base and tests it again.	Balance, cause and effect, persistence.	Outline; legacy tower mechanics may inform, but no legacy title is reused.
110	**The Snack Question**	The Friends compare food choices and ask an adult for help with ingredients.	Nutrition language, allergy safety, choice.	Outline; nutrition review required.

Unit	Working title	Story movement	Curriculum bridge	Status
111	**Turtle Tempo**	Zuri helps the group shift from energetic movement to a calm, repeatable rhythm.	Self-regulation, motor planning, rhythm.	Outline.
112	**The Return Basket**	A classroom item is found, identified, and returned through a shared routine.	Responsibility, classification, memory.	Outline.
113	**We Can Show It**	The Friends teach a family member one action from the classroom and adapt it at home.	Recall, family connection, transfer.	Outline; family-language review required.

The public curriculum now lists Units 1-11 as drafts and Unit 12 as in writing, with no recorded approvals. Five Story Time books remain in development. A slate entry cannot establish delivered media until its script, timed video, captions, language review, rights and portal acceptance are recorded.

Episode card and scene gate

Before a scene moves to layout, the card must answer: Who wants what in the first minute? What changes? Which Friend's strength creates the first attempt? What consequence can a preschooler see? Where does the child pause? How does the group repair? What sound or gesture carries the idea without extra explanation? What can be done with an object, picture, or body? What does the adult need to prepare? What goes home? The director then blocks the action so the child can read faces, hands, objects, and space. A scene with only talking heads is not ready for final animation.

The timing rule for the current public program is four six-minute sessions, Monday through Thursday, for ages three and up, twenty-four minutes total per week. Older timing proposals remain development history. A future change requires an owner decision and a new release record. The story format itself remains modular: opening cue, problem, first attempt, participation pause, repair, repeatable close. This lets a center use the screen, audio, a printed card, or a live educator demonstration without pretending the formats are identical.

HISTORICAL REFERENCE | Current controls at front supersede financial, scope and readiness assumptions.

Learning Zones: Booker / reading

Generated room concept. This shows the intended aesthetic, not an installed or manufactured outcome.

A matching character, color and poster make each zone legible. Dimensions, materials, safety, rights and supplier proof remain part of the release gate. Lumi's next prominent image requires a green-iris continuity check.

Learning Zones: Bop / movement

Generated room concept. This shows the intended aesthetic, not an installed or manufactured outcome.

A matching character, color and poster make each zone legible. Dimensions, materials, safety, rights and supplier proof remain part of the release gate. Lumi's next prominent image requires a green-iris continuity check.

Learning Zones: Zuri / discovery

Generated room concept. This shows the intended aesthetic, not an installed or manufactured outcome.

A matching character, color and poster make each zone legible. Dimensions, materials, safety, rights and supplier proof remain part of the release gate. Lumi's next prominent image requires a green-iris continuity check.

World and set-use reference

The classroom is a working place rather than a blank backdrop. The entry, cubbies, circle rug, discovery table, reading nook, calm corner, café or snack table, art surface, wash area, and outdoor route each create a different kind of action. The team should establish a stable wide view, a child-height medium view, and a hand/object close-up for each recurring location. The background carries continuity: a missing basket, moved chair, or open gate must be intentional.

Location	Story use	Repeatable props	Accessibility and safety check
Entry and cubbies	Arrival, transition, first-day stories.	Name/photo cards, hooks, family note pocket, backpack.	Clear route; no child name or family data shown in public sample art.
Circle rug	Greetings, songs, group decisions.	Visual schedule, talking object, floor markers.	Leave transfer space; never require sitting in one posture.
Discovery table	Compare, predict, sort, investigate.	Large safe objects, trays, magnifiers, picture cards.	Adult checks choking, sharp, heat, and allergy risks.
Reading nook	Booker language, quiet regulation, retelling.	Red book, cushions, sequence cards.	Offer audio, picture, and movement alternatives.
Calm corner	Pause, breathe, request space, return.	Emotion-neutral choice cards, timer, soft non-small-part item.	Not a punishment corner; child can rejoin without shame.
Café/snack table	Family-style language and food routines.	Menus, cups, ingredient cards, serving tools.	Adults verify ingredients and portions; no pressure to taste.
Outdoor route	Gross motor, nature, movement transitions.	Cones, large balls, leaves, chalk.	Check surface, weather, visibility, and mobility access.

The visual system uses clear silhouettes, readable hands, restrained background detail, and warm light. A prop earns a close-up only when the child needs it to understand the action. Posters and carpets are diegetic only when they belong to the classroom; the company mark, store call to action, and investor language stay outside the story world.

Detailed production checklists

Character and art continuity

- Check species, pronouns, eye color, fur or shell color, wardrobe, icon, prop, and zone identity against the dated reference sheet.
- Check the full silhouette at thumbnail size and in grayscale.
- Check that Booker keeps blue eyes and the blue hoodie; Lumi keeps pink fur and green eyes; Zuri remains a green turtle with glasses; Bop remains grey-furred with green overalls and purple identity.
- Check Bop's purple identity against zone art; do not revive the older orange graphics-only treatment.

- Check that Zuri's glasses, hat, and satchel are not removed for convenience.
- Check that Booker’s book, Lumi’s bow, and each signature gesture remain readable in a crowded frame.
- Check hands, mouths, eye direction, and physical contact in every performance beat.
- Label generated images as concept, review, or approved production art.
- Keep a source file, export, dimensions, creator/provider, rights state, and reviewer with each accepted asset.
- Reject accidental aging-up, romance, villain framing, product-selling behavior, or a character being reduced to a single trait.

Voice, music, and mix

- Record a table read before spending on a full connected render.
- Keep child dialogue short and playable; the working guide uses approximately 130 words per minute and generally twelve words or fewer per sentence.
- Use the strategy line in its proper context; do not turn it into a catchphrase that crowds out natural speech.
- Test the lead's breath, hesitation, gaze, and listener reaction in connected scenes.
- Record clean dialogue, room tone, Foley, music stems, lyric sheet, captions, and mix notes separately.
- Check loudness, intelligibility, pause length, and whether a child can copy the movement without chasing the audio.
- Obtain native Spanish review for words, rhythm, captions, print, and family instructions.
- Record rights and permitted use for theme, songs, stock, performances, and generated elements.

Curriculum and educator handoff

- Write the learning intention in one sentence and the child action in one verb.
- Identify a screen-free alternative and an audio-only alternative.
- List materials by size and safety, with adult-only steps called out.
- Include an invitation, a pause, a repeatable action, and a family bridge.
- State what an educator may observe without treating it as a score or diagnosis.
- Provide language supports, gesture, picture, AAC, mobility, sensory, and participation options.
- Keep public parent copy brief and honest; place fuller educator guidance behind the correct portal role.
- Mark meals, movement, and standards language as guidance-aligned design unless a qualified reviewer has made a formal claim.

Release and evidence

- Gate 0: canon, ownership, and rights boundary signed.
- Gate A: premise, character reference, location, and prop list accepted.

HISTORICAL REFERENCE | Current controls at front supersede financial, scope and readiness assumptions.

- Gate B: script, causal chain, child pause, safety note, curriculum card, and bilingual plan reviewed.
- Gate C: read-through, timed animatic, blocking, and performance notes complete.
- Gate D: connected render, final voice, music, Foley, captions, language review, and continuity pass complete.
- Gate E: accessibility, product safety, privacy, rights, and age-fit checks complete.
- Gate F: named portal destination, upload record, version, hash, acceptance, and rollback path recorded.

A download or HTTP response is not acceptance. The release record must tie the exact reviewed file to the exact delivered file. The physical product record must also identify whether the image is a mockup, a sample, or a manufactured item.

Accessibility delivery and review plan

The original Bible sets an access ambition that should survive the revision. These are working requirements, not delivered assets or verified credentials. Assign a reviewer and budget before committing a release date; agree the launch scope with participating families and educators.

Deliverable	Working scope	Review evidence
Captions and transcripts	Accurate English captions, speaker and sound cues; tagged English/Spanish transcripts after human language review	Reviewer, dated file and playback check
Audio description	Human-written and voiced description for visual actions that carry the learning; preserve response pauses	Description script, listener review and mixed master
Calm audio option	Reduced sensory load while keeping speech, story cues and participation audible	Mix comparison and intended-audience review
AAC and picture supports	Printable sequence and communication boards with pointing, gesture and nonverbal response choices	Educator review and classroom trial
Signed-language version	Scope a later ASL version with Deaf reviewers and qualified signing performers; do not substitute generated signing	Qualified reviewer, approved performance and rights record
Physical participation	Seated, mobility, sensory and quiet alternatives for movement and classroom invitations	Safety review and adaptation notes

Captions, the teacher pause map, picture supports and participation alternatives belong in the pilot acceptance scope. Audio description, calm mixes and signed-language versions need explicit phase, cost and owner decisions; an unfunded later phase must not be advertised as available. English and Spanish releases have separate language acceptance records.

For Gate C, record the episode/version, table-read and animatic files, runtime, participation pauses, safety changes, outstanding access work, named approvers and decision date. At Gate E, record each access deliverable as accepted, pending or outside the agreed release scope, with its evidence link. The release owner reconciles both records before Gate F. A blank reviewer field keeps the claim open.

Curriculum implementation reference

The program's working loop is Watch, Talk, Do, Play, Reinforce, Take Home. A Monday session can introduce a word or routine; Tuesday can repeat it through movement; Wednesday can change one variable; Thursday can show the child teaching or using it elsewhere. The sequence is a suggestion for educators, not a promise that every center follows the same schedule.

For ages three to five, a useful observation note may read: “During the second try, Sam pointed to the wider base and waited for a turn.” It should not read: “Sam failed balance.” The note names context and action. A child may point, sign, use AAC, speak Spanish, speak another language, move, watch, or return later. The educator adapts the invitation rather than grading the child.

A meal or snack story uses family-style language and adult-managed safety. The Bible does not prescribe a medical diet. A center should verify ingredients, allergies, portions, substitutions, and local requirements with its qualified food lead. Movement appears in transitions and throughout the day; it is not reduced to a single weekly screen block. The same principle applies to language: bilingual moments are meaningful when they help a child understand or participate, not when they decorate a title card.

Archival craft reference

Superseded episode mechanics

Preserved for writing and blocking technique. This tower story is not the current Episode One.

EVIDENCE KEY

Verified: source or test recorded. Configured: setup exists. Proposed: terms to agree. Planned: delivery or acceptance outstanding. Each claim carries its own status in the text.

Archival craft appendix: original Episode 101 mechanics

The original source spends substantial space on Wobbly Welcome Tower and Family 101 Kitchen Tower. That material remains useful as craft history: a group sees a structure wobble, a rounded piece rolls, a soft “FLUMP” signals a change, and the repair comes from widening the base and sharing jobs. The old beat sheet, color script, and classroom activation can inform blocking, sound, and child participation. They are not the current Episode 101. The active direction is **Booker Makes Room**, with Pip’s first day at the center of the story. Any reuse requires a new title, new episode number or an owner-approved rewrite, and a fresh safety and continuity review.

The archival script also demonstrates why connected blocking matters. Establish the room before the problem, show the object leaving the hand, let listeners react, hold the pause long enough for a child to answer, and show the changed arrangement in a clean wide shot. Those are preserved craft rules. The old timing, character colors, title, tag, and any finished-production implication are retired from current claims.

Second-pass source and omission notes

The source Bible contains repeated appendices, duplicated tables, page furniture, and multiple historical versions of the same decisions. The restoration retains the operational content once, with a status label. It does not reproduce every repeated paragraph. Details that remain unresolved are recorded rather than silently upgraded: final house line; dated character-sheet acceptance; canon status for all supporting names and families; final Episode 101 script and media; native Spanish sign-off; plush and physical-product safety; executed rights assignments; and portal acceptance evidence.

The original source includes market-size, standards, legal, and competitor language that requires current external verification before investor use. The restoration preserves the decision to verify those claims and the questions the team must answer; it does not present old figures as current facts. It also preserves the merchandise firewall: products may extend the world, but a child-facing story cannot become a sales pitch.
