CURRENT PILOT BUSINESS PLAN

A measured first center, built to earn the right to expand.

One owned location in Independence, Missouri | 40 children ages 2–5 | 12 months | first-month checkpoint

Futures Friends joins Booker, Lumi, Zuri and Bop to early literacy, movement, nutrition, belonging and family routines. This pilot reuses the website, CRM, ATS, store, characters and learning materials while finishing the secure family and child workflows required for one real center.

Decision posture: This is an itemized cost estimate, not a financeable loan recommendation. Historical $910/month tuition does not cover the modeled recurring cost. Building payment, lender terms, actual liability and past creator compensation are unresolved.

1. The investment case

The pilot is designed to answer operational questions with real families and real cash records before national rollout. Expansion is a Phase 2 decision, not part of this ask.

$423,849.52	$646,074.62	$477,066.02	-$57,738.02
COST ESTIMATE BEFORE FINANCING	YEAR 1 WITH CONTINGENCY	ANNUAL RECURRING	YEAR 2 MARGIN AT $910

Decision item	Current model	What must be verified
Center	Owned Independence, MO; ages 2–5; 40-place ceiling	Licensed capacity, rooms, age mix and open hours
Funding	Cost estimate before financing $423,849.52	Do not call this a loan ask until economics are positive
Building	Owner-specified $140,000 refinance-enabling need	Payoff statement, closing costs, points and new payment
Revenue	Historical $910/month; 96% collection	Signed tuition, discounts, demand and actual collections
Debt	Cash after recurring operations and building payment	Lender offer, coverage, collateral and guarantees

At 40 children on the historical price, annual receipts are $419,328.00 and year-two operating margin is -$57,738.02 before the building payment. The model therefore surfaces a required pricing or cost reset instead of presenting borrowed cash as profit.

2. Staffing and coverage

The roster has two full-time adults. The rest are individually costed part-time shifts, relief, food service and substitutes. The names are a planning roster; they are not twelve simultaneous hires.

Person	Hours/year	Rate	Annual wages	Shift / role
Full-time director	2,080	$24.00	$49,920.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Full-time teacher 1	2,080	$20.00	$41,600.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 2 — 7am–noon	1,300	$20.00	$26,000.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 3 — 7am–noon	1,300	$20.00	$26,000.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 4 — noon–5pm	1,300	$20.00	$26,000.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 5 — noon–5pm	1,300	$20.00	$26,000.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 6 — 3pm–5pm	520	$20.00	$10,400.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time teacher 7 — 3pm–5pm	520	$20.00	$10,400.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time break/admin floater	1,040	$20.00	$20,800.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Part-time food worker	1,040	$19.00	$19,760.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Substitute 1	320	$20.00	$6,400.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and
Substitute 2	320	$20.00	$6,400.00	Total planning roster, not all new hires. 52 paid weeks include closure/training allowance; actual roster and

Total planning wages: $269,680.00. The assumed schedule keeps four adults on the floor, subject to the approved age mix and room rules. If the actual mix requires a fifth adult, the register adds at least 2,500 service hours at $20/hour before relief, taxes and insurance. The food worker does not count while preparing food; the director counts only while assigned to the room.

Employer taxes, workers compensation, optional benefits, background checks, CPR and training are separate line items. No blanket unemployment reserve is hidden in the model.

3. Cash, enrollment and repayment

The first-year cash schedule ramps enrollment from 30 to 40 children. One-time launch spending is weighted toward the first month; the schedule shows when cash is needed rather than treating the full annual total as a monthly payment.

Month	Children	Receipts	Recurring	One-time	Net	Cumulative
1	30	$26,208.00	$38,904.69	$66,133.80	-$78,830.49	-$78,830.49
2	34	$29,702.40	$39,245.01	$36,741.00	-$46,283.61	-$125,114.10
3	36	$31,449.60	$39,415.18	$22,044.60	-$30,010.18	-$155,124.28
4	38	$33,196.80	$39,585.34	$14,696.40	-$21,084.94	-$176,209.22
5	40	$34,944.00	$39,755.50	$7,348.20	-$12,159.70	-$188,368.92
6	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$193,180.42
7	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$197,991.92
8	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$202,803.42
9	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$207,614.92
10	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$212,426.42
11	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$217,237.92
12	40	$34,944.00	$39,755.50	$0.00	-$4,811.50	-$222,049.42

Repayment rule: monthly debt service is considered only after recurring operations and the actual building payment. A 1.25 coverage screen is a planning test, not a lender promise. The present case has no positive debt capacity because the mortgage is unknown and operating margin is negative.

Break-even realized tuition: $1,036.37 per child per month before building/debt. This does not prove a profitable enrollment count; tuition, costs, licensed capacity and demand still require verification.

4. Every priced category

Each row in the digital register carries an item, quantity, rate, formula, bucket, evidence basis and source URL where one exists. Published prices, tax formulas and quote-required allowances remain distinguished.

Category	Annual total	Register evidence
Staff wages	$269,680.00	Itemized rows in CSV / JSON
Platform completion	$57,000.00	Itemized rows in CSV / JSON
Curriculum and clinical review	$38,600.00	Itemized rows in CSV / JSON
Food and nutrition	$37,688.00	Itemized rows in CSV / JSON
Building operations	$32,720.00	Itemized rows in CSV / JSON
Pilot content production	$25,740.00	Itemized rows in CSV / JSON
Platform assurance	$24,000.00	Itemized rows in CSV / JSON
Employer taxes	$23,569.84	Itemized rows in CSV / JSON
Pilot content support	$14,400.00	Itemized rows in CSV / JSON
Insurance	$12,700.00	Itemized rows in CSV / JSON
Administration	$11,400.00	Itemized rows in CSV / JSON
Local marketing	$11,400.00	Itemized rows in CSV / JSON
Platform support	$10,800.00	Itemized rows in CSV / JSON
Staff benefits	$9,945.60	Itemized rows in CSV / JSON
Refinance transaction	$6,400.00	Itemized rows in CSV / JSON
Payments	$5,919.04	Itemized rows in CSV / JSON
Staff insurance	$5,393.60	Itemized rows in CSV / JSON
Staff readiness	$4,620.00	Itemized rows in CSV / JSON
Cleaning and consumables	$4,548.00	Itemized rows in CSV / JSON
Safety and equipment	$4,220.00	Itemized rows in CSV / JSON
Hosting and software	$4,052.20	Itemized rows in CSV / JSON
Classroom and office consumables	$3,199.74	Itemized rows in CSV / JSON
Classroom materials	$2,904.00	Itemized rows in CSV / JSON
Pilot devices	$2,580.00	Itemized rows in CSV / JSON
Store pilot	$550.00	Itemized rows in CSV / JSON

The complete 311-line register is available at Pilot_40_Children_Itemized.csv and the digital cost explorer. The PDF is a decision brief; the register is the audit trail.

5. Platform delivery and acceptance

The pilot reuses the existing website, CRM, ATS, store and character library. This is a completion allowance for one center and 40 children; it is not the replacement price of everything already created.

Platform allocation	Amount / timing
Completion: 380 hours at $150	$57,000.00 one-time
Independent test / retest and counsel	$20,400.00 one-time
Total one-time platform work	$77,400.00
Support, privacy maintenance and hosting	$18,452.20 annually; $1,537.68 monthly average
Year-1 platform allowance	$95,852.20
Platform contingency already included	$11,610.00 within overall contingency; do not add twice

$150/hour is a selected planning allowance, not a published market average or a vendor quote. A fixed-scope completion quote must confirm that the existing code is reusable.

Completion estimate, not proof of a live service. The October 10 source plan reported unhosted services, draft activities, unconnected billing and pending consent/testing. Current live acceptance remains unverified.

The allowance can be enough only if an audit confirms reusable code and a contractor accepts the remaining scope. Release payment against working deliverables. Public screens alone do not establish readiness.

One-time engineering: every deliverable

ID / work	Calculation / amount	Why essential / acceptance evidence
P250 Existing-build inventory and deployment acceptance	20 hours × $150.00 = $3,000.00; one-time	Confirm the existing work is reusable before committing the completion price. Code and dependency audit, written remaining-work scope, reproducible staging and production deployment.
P251 Family/child authentication and guardian consent	40 hours × $150.00 = $6,000.00; one-time	Give parents secure access to their own family and preserve consent evidence. Invites, login, password reset, family linking and parent consent; another family cannot be accessed.
P252 Existing CRM ATS store integration	25 hours × $150.00 = $3,750.00; one-time	Connect the existing CRM, ATS and store to the pilot workflows. Existing applicant/customer records and store checkout tested end to end; this is integration, not three new products.
P253 Curriculum work records and parent progress digest	60 hours × $150.00 = $9,000.00; one-time	Make approved learning activities teachable and save the work children complete. Educator-approved activities, persistent learning records, teacher review and a parent weekly digest.
P254 Finite character messages and QR routines	20 hours × $150.00 = $3,000.00; one-time	Deliver short character-led routines safely at home and in the classroom. Parent-approved finite character messages and QR routines; no open-ended child AI conversation.
P255 Bilingual product review and fixes	25 hours × $150.00 = $3,750.00; one-time	Let families complete essential workflows in English or Spanish. Critical journeys and content reviewed in both languages; native-language sign-off required.
P256 Role security private files and consent audit	65 hours × $150.00 = $9,750.00; one-time	Protect child records and files behind server-enforced access rules. Staff MFA, role and family isolation, private uploads and audit events tested with separate accounts.
P257 Backup restore monitoring deployment controls	40 hours × $150.00 = $6,000.00; one-time	Keep a recoverable copy and respond when something fails. Offsite backups, demonstrated restore, monitoring, rollback and a named incident owner.
P258 Accessibility iPad and browser verification	35 hours × $150.00 = $5,250.00; one-time	Make the pilot usable on the devices families actually use. Safari/iPad, mobile layout, keyboard and accessibility checks on agreed devices.
P259 UAT staff training onboarding and launch	50 hours × $150.00 = $7,500.00; one-time	Prove the complete pilot works before inviting real families. 40 synthetic family accounts tested end to end, staff training, documented acceptance and a 30-day checkpoint.

Assurance and ongoing service

ID / service	Calculation / amount	Timing / delivery
P260 Independent manual web/API penetration test with retest	1 engagement × $12,000.00 = $12,000.00	one time; Obtain independent security evidence. Manual multi-role application/API penetration test and retest; no unresolved Critical or High findings at launch.
P261 Privacy counsel consent contracts and retention review	24 legal hours × $350.00 = $8,400.00	one time; Review child privacy and home-use obligations with qualified counsel. Consent, retention, vendor data agreements and home-use notices reviewed; legal approval is not yet established.
P262 Security/privacy maintenance review	24 hours × $150.00 = $3,600.00	recurring; Keep privacy and security procedures current through the pilot. 24 hours/year, averaging two hours/month; documented review and update log.
P263 Technical maintenance and support	72 hours × $150.00 = $10,800.00	recurring; Provide a named person for routine fixes and operating support. 72 hours/year, averaging six hours/month; written response targets. Extra work requires a separate quote, not 24/7 coverage.

Hosting, tools and recovery: recurring

ID / expense	Calculation / annual amount	Purpose
P264 DigitalOcean production compute	12 months × $48.00 = $576.00	Production server needed for the pilot service. Production server configured and verified; usage, renewal and account ownership recorded.
P265 DigitalOcean staging compute	12 months × $24.00 = $288.00	Staging server needed for the pilot service. Staging server configured and verified; usage, renewal and account ownership recorded.
P266 Object storage	12 months × $5.00 = $60.00	Object storage needed for the pilot service. Object storage configured and verified; usage, renewal and account ownership recorded.
P267 Daily compute backup	12 months × $21.60 = $259.20	Daily server backup needed for the pilot service. Daily server backup configured and verified; usage, renewal and account ownership recorded.
P268 Supabase Pro	12 months × $25.00 = $300.00	Managed database/authentication needed for the pilot service. Managed database/authentication configured and verified; usage, renewal and account ownership recorded.
P269 Transactional email	12 months × $20.00 = $240.00	Transactional email needed for the pilot service. Transactional email configured and verified; usage, renewal and account ownership recorded.
P270 Independent encrypted backup storage	12 months / seats / units × $10.00 = $120.00	Offsite recovery storage needed for the pilot service. Offsite recovery storage configured and verified; usage, renewal and account ownership recorded.
P271 Uptime monitoring	12 months / seats / units × $12.00 = $144.00	Monitoring needed for the pilot service. Monitoring configured and verified; usage, renewal and account ownership recorded.
P272 Domain renewal	1 months / seats / units × $25.00 = $25.00	Domain needed for the pilot service. Domain configured and verified; usage, renewal and account ownership recorded.
P273 Password manager	60 months / seats / units × $8.00 = $480.00	Staff password manager needed for the pilot service. Staff password manager configured and verified; usage, renewal and account ownership recorded.
P274 Help desk subscription allowance	12 months / seats / units × $30.00 = $360.00	Help desk needed for the pilot service. Help desk configured and verified; usage, renewal and account ownership recorded.
P275 SMS and registration allowance	12 months / seats / units × $25.00 = $300.00	SMS needed for the pilot service. SMS configured and verified; usage, renewal and account ownership recorded.
P276 CDN/security plan allowance	12 months / seats / units × $25.00 = $300.00	CDN/security needed for the pilot service. CDN/security configured and verified; usage, renewal and account ownership recorded.
P277 Cloud usage overage allowance	12 months / seats / units × $50.00 = $600.00	Usage overage allowance needed for the pilot service. Usage overage allowance configured and verified; usage, renewal and account ownership recorded.

Launch acceptance: proof before families rely on it

1. Code and dependency audit, written remaining-work scope, reproducible staging and production deployment.

2. Invites, login, password reset, family linking and parent consent; another family cannot be accessed.

3. Existing applicant/customer records and store checkout tested end to end; this is integration, not three new products.

4. Educator-approved activities, persistent learning records, teacher review and a parent weekly digest.

5. Parent-approved finite character messages and QR routines; no open-ended child AI conversation.

6. Critical journeys and content reviewed in both languages; native-language sign-off required.

7. Staff MFA, role and family isolation, private uploads and audit events tested with separate accounts.

8. Offsite backups, demonstrated restore, monitoring, rollback and a named incident owner.

9. Safari/iPad, mobile layout, keyboard and accessibility checks on agreed devices.

10. 40 synthetic family accounts tested end to end, staff training, documented acceptance and a 30-day checkpoint.

Six support hours per month is lean. Agree response targets, an incident owner, escalation pricing and changes outside scope; this allowance does not buy round-the-clock staffing.

Separately included in the full budget: curriculum/clinical review $38,600; finite pilot content $25,740; annual creative oversight $14,400; devices $2,580; local marketing $11,400. These are not additional to the total model. The $3,000 generation cap is not a full 12-episode, seven-minute season. National rollout, bulk tablets and open-ended child AI are excluded.

Budget sufficiency and repayment are separate decisions. The current historical-tuition case still has an operating deficit; platform delivery does not fix it.

6. Sensitivity and the economic reset

Price and occupancy must be tested together. These are scenario calculations, not market tuition claims and not signed demand.

Children	Tuition / month	Annual receipts	Operating margin*
30	$910.00	$314,496.00	-$152,360.26
35	$910.00	$366,912.00	-$105,049.13
40	$910.00	$419,328.00	-$57,738.01
30	$1,250.00	$432,000.00	-$35,849.16
35	$1,250.00	$504,000.00	$30,880.47
40	$1,250.00	$576,000.00	$97,610.11
30	$1,300.00	$449,280.00	-$18,715.18
35	$1,300.00	$524,160.00	$50,870.12
40	$1,300.00	$599,040.00	$120,455.42
30	$1,400.00	$483,840.00	$15,552.79
35	$1,400.00	$564,480.00	$90,849.42
40	$1,400.00	$645,120.00	$166,146.04

*Before building payment, investor debt and profit tax. A positive scenario is not a financing commitment. The current historical $910 case remains negative at 40 children. A lender-ready plan needs signed pricing, verified costs and a positive recurring margin with coverage after building payments.

Stress case with no tuition receipts: $825,830.12 before mortgage and financing. This is a planning boundary, not a recommended raise.

7. Gates, evidence and blind spots

Funding should release against evidence. Each gate converts a claim into something an investor can inspect.

Gate	Evidence required before release
Scope	Signed age roster, room capacity, hours, current staff and payroll
Revenue	Signed tuition schedule, discounts, enrollment demand and collection history
Building	$140,000 purpose, lender payoff/payment statement, points and closing terms
Product	Working family/child records, consent, billing, role isolation, private files and restore
Safety	Educator and clinical review, approved content, state-required training and insurance
Security	Independent manual test, retest letter, backup/restore and iPad/browser checks
Economics	Three months actual receipts and costs; positive ongoing cash before debt service
Rights	Creator contracts, deliverables, payments and character/video rights reconciled

Known exclusions and unknowns: mortgage payment, lender fees, past creator fees, actual food/utility/insurance quotes, current tax treatment, signed tuition, state approval/accreditation, national expansion receipts and season production. They are excluded or labeled unknown; they are not silently zero.

8. Source and review notes

This current pilot package is intentionally narrower than the historical expanded plan. It preserves the substantive operating direction while aligning the financial story to one center and the user-approved staffing structure.
